Let us know when you find out. Chesapeake asked me for a list of EPA attendees. I included her, but not you.

well in our discussion this Friday

The best thing to do is just put the info into Google maps, with the Ok City airport as the starting point, and the company address as the end point. It will give the most comprehensive, turn by turn info. The address is:

5600 North May Avenue
OKLAHOMA CITY, OK 73112

When she arrives, she should go in the front door and we will be meeting in the lobby at 8:25 am. This is not their main campus, and they don't own the whole building. We will be calling Chris Hill when we arrive to pick us up (then don't even have a reception center). (b) (6)

On another note, I spoke with the VP for Environmental, Health and Safety at Devon Energy today about our other project. He will get back to me later this week.

(b) (5) This is just for discussions with the multiple drillers who
have been invited, and we can still discuss the local geology in conceptual terms
with no problems.

Was Ramona able to set up travel to come Friday?

Subject: Chesapeake requests we do not disclose the location of the well in our discussion this Friday

Hi folks,

I received a request this morning from Chesapeake that in our discussions with the horizontal drillers this Friday that we keep the location of the proposed gas well confidential. This includes even the county. We can discuss the general geology, and the depths of the monitoring wells that we would expect to install.
